

## EVALUATION PROTOCOL

### Psychologist

You have full knowledge of the human soul.

The Infinite needs peace.

The Earth believes in you.

Anyone can be redeemed.

You trust ATE2272's assessments.

### Task: Loyalty rate monitoring

Monitor the *Loyalty rate* of your fellow Astronauts towards Earth, tracking the increase or decrease of this value from your first assessment.

The most important parameter is the crew's behaviour: A choice made for the sake of the Infinite's mission entails an immediate 1-point increase of that Astronaut's *Loyalty rate*, while a selfish choice in defiance of the mission entails a 1-point decrease. In fact, any Astronauts who fail to join the human chain during a *Gravitational slingshot* will receive a 1-point decrease, while any volunteers for cryogenic sleep in an emergency will receive a 1-point increase. You have two more tools: a IASA-approved psychological test you helped design and the VK Machine, a military procedure entrusted to the Security officer. You must help them evaluate the results.

If an Astronaut's *Loyalty rate* drops to 0, take them aside and share your dire evaluation. Only then can you inform the Captain, who will decide how to contain the situation. You have the right to report to the Security officer instead of the Captain, if you deem it the best course of action.

### IASA psychological test

Put these concepts in order of importance:  
*Home. Loyalty. Discipline. Family. Survival.*

Assign a crew member of the Infinite to each of these colours:

*Yellow. Orange. Red. White. Green.*

A woman, neglected by an overworked husband, spends the night with her lover on the other side of the river. As she makes her way home, a lunatic threatens her on the bridge, keeping her from crossing it. She goes to the ferryman for safe passage, but she has no money and he refuses to let her on his boat without payment. So she asks her lover for money, and he refuses with no explanation. She then turns to a friend who lives nearby: Having always loved her, he is disappointed after hearing the full story and refuses to help. With no other options, the woman tries to cross the bridge and is killed by the lunatic.

Order the six characters from least to most guilty:

*Woman. Husband. Lover.*

*Lunatic. Ferryman. Friend.*

Your house is burning down. In what order do you save these items:

*Your mother's jewels. Your father's watch.*

*Your old teddy bear. Your favourite book.*

*Your keys and documents.*

The ship is sinking. In what order do you save these passengers:

*A child. The president of IASA.*

*Your brother. Your rival. Yourself.*
